DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: on page 21 and 28 of the specification please update the US Patent Application number.

Appropriate correction is required.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, *the method steps as recited in claims 4, 7 and 59* must be shown or the feature(s) canceled from the claim(s). No new matter should be entered. *Please note the 112, 1st rejection below.*

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR

1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 4-18 and 59-87 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claims 4,7 and 59 appear to recite the methods as illustrated in Figs.2A and 2B.

The claims recite starting from block 202 to block 226. However, the claims do not appear to recite the step by step procedures of Figs.2A and 2B as described in the specification and illustrated in the figures. For example in claim 59, the claim recites the blocks of 202, 204, 206, 220 (calculating I and Q correlation values), then goes back to block 210 (selecting I and Q correlation values) and refers to block 222 (selecting weights...) wherein claims 4 and 7 appear to recite the same steps. The claims do not appear to clearly recite the steps as recited in the specification and the drawings performing the steps from 202-226 without moving back a step and skipping a step, thus do not describe in the specification in such a way as to reasonably convey to one skilled in the art. Please explain

further as to which method step is clearly explained in the specification and the block elements of the figures.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A dependent claim of claim 6 fails to particularly point out and distinctly claim the subject matter by reciting to depend on the claim itself.

Allowable Subject Matter

6. Claims 1-3 and 19-58 would be allowable if rewritten or amended to overcome the claim objections, set forth in this Office action.
7. The following is a statement of reasons for the indication of allowable subject matter:
Present application discloses a method steps of correlating a received GPS signal for estimating a carrier frequency wherein a range of candidate frequencies are selected, dividing the received signal into a set of data blocks, and selecting correlation values from a range of candidate frequencies that best matches to a target frequency. Prior arts, Akopian and Tachita, correlation of received GPS signal, however, prior art do not teach the combination of all the method steps recited.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Tachita teaches a GPS receiver correlating a received signal calculating a phase offset of carrier frequency.

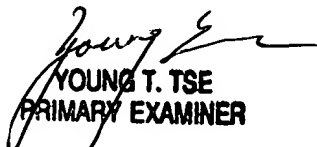

Akopian teaches correlation of spread spectrum signal wherein the received signal is divided into plurality of sections.
